

Disciple Oaks Retreat Center  
 Work Projects List for Volunteers  
 Updated November 7, 2011

Disciple Oaks Retreat Center is in the process of renovating, repairing and upgrading our current facilities. We would greatly appreciate any volunteers who are willing to come out and assist us with projects which we need to accomplish. Below is a list of some of the most immediate projects which we need volunteer help to accomplish. If you have a group of people at your church, your place of work, or your community, or if you, individually, would like to come out and work on one of these projects, please contact Dale Fowler, Program Manager, to coordinate and plan a date to volunteer. (Due to our retreats and reserved events, many projects can only be done on dates which do not conflict with scheduled activities. We also want your time to be as productive as possible by coordinating tools, materials and volunteers all together.) We have made an attempt to organize these projects into categories indicating the type of work most of that project falls into. Any questions about listed projects should be directed to Dale. We will continue to revise and add to this list, so please watch for periodic updates as projects are accomplished.
